

ANDERSEN

Designer EV Charging

Service and Style

Andersen's range of home EV charge points are crafted with design and style in-mind. The bespoke nature of the charge points boast quality and luxury - this is why a tailored and attentive customer experience is paramount to the brand through every touchpoint. We believe that the quality of our service should match the quality of our charge points.

Our status as a Which? Trusted Trader, as well as over 1,200 five-star reviews on Trustpilot, is testament to our dedication to the highest levels of service at all stages of your Andersen journey.

Our consultation service allows you to ask the questions you need to before purchasing, allowing you to have complete confidence in our service.

Upon purchase of your Andersen home charge point, you will gain access to a lifetime concierge service in order to help with any queries you have. This service provides you with direct access to EV experts, who can provide advice on dedicated EV smart charging tariffs and other tips on how to get the most out of your charge point.

Our market-leading 7-year warranty gives you complete confidence that you've bought a product that's built to last.

£1,199 delivered

Andersen Quartz Vision

Introducing the Andersen Quartz Vision. An evolution of its highly compact, premium domestic charge point, the Andersen Quartz Vision features a digital display screen so users can check charging status at a glance.

The Andersen Quartz Vision 4.3-inch LDC display makes it easy to see key charging information instantly. It shows scheduled charge times and live power delivery in kilowatts all on a clear, easy-to-read screen. Once a session ends, the screen displays the total energy delivered, making it simple to keep track of usage at home. The screen works seamlessly alongside the Andersen app, giving customers extra flexibility in how they monitor and manage their home EV charging.

The Andersen Quartz Vision can be configured for an additional £88 and is also protected by Andersen's market-leading 7-year warranty – the same guarantee that is provided with all Andersen products.

Made to withstand all conditions

Due to its long-lasting and stable properties, Andersen use Accoya® wood as the trusted material to produce their premium front fascias. Andersen wooden fascias are hand-crafted in the UK. Accoya® is a sustainably sourced and resilient wood which has been treated to withstand all weather conditions. It is extremely high-performance and has been tested to the highest environmental standards.

Prestige Partnerships

At Andersen EV, we believe that great partnerships are the foundation of innovation and excellence. Our collaborations with industry leaders reflect our commitment to delivering premium charging solutions that combine cutting-edge technology with refined design. Our bespoke charge points are crafted to enhance both the functionality and aesthetic of your home, qualities we proudly share with our vehicle and brand partners.

We are honoured to work alongside iconic names such as Jaguar, Land Rover, Renault Group and Porsche GB. Together, we create a seamless charging experience that complements both the elegance of your home and the performance of your vehicle.

Our collaborations reflect our shared dedication to excellence, luxury and sustainability and include premium, design-led brands such as CALLUM, Eversati and COAT Paints.

Quality and Reliability

Every Andersen product is hand-crafted to order in Bedfordshire, England. There is a dedicated team to support and oversee every step of the chargers lifecycle, from in-house development, production and quality control, all the way to our customer care and Concierge service. This commitment to quality extends beyond our products and is an integral part of what sets Andersen apart as the UK's leading premium home EV charging brand.

With pioneering design and marketing-leading service provided by Andersen, it is only right that a charge point with such precision and quality comes with a 7-year warranty, allowing complete piece of mind.

With a charge point available to suit every person, you are also able to pay in a way that suits you. To complete your order you can pay in full, pay using Andersen's Easy Pay option or you can use PayPal Pay-in-3.

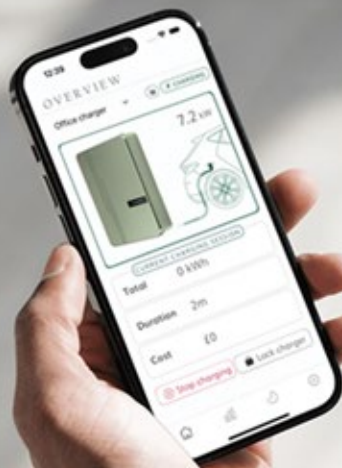

Please see Andersen T&C's at www.andersen-ev.com for information on all promotions, awards and payment methods.

The Andersen App

The Andersen App allows you to get the most out of your charge point. With an easy-to-use interface at your fingertips, you are able to save on costs and control and monitor your charge sessions. Integrate your EV charging tariff with the Andersen App and access savings of up to £452* per annum. With the Andersen App, you will also be able to remotely lock your charger, set-up charging schedules, charge using your home's solar and monitor the cost of your charges, among other useful and convenient features. Use the Quick Start Guide in your Welcome Pack to get set up with the Andersen App.

*According to Andersen's Quarterly EV charging data index 2025.

Your Charger. Your Way.

At Andersen EV, every charge point is designed to complement your home. Whether your property is period or modern, rural or urban, our range of products offer a considered blend of technology and timeless design.

With a choice of metal finishes, four shades of Accoya wood and a limited-edition carbon fascia option, each unit can be personalised to reflect the colours of your home, your vehicle, or your individual style. By choosing the Andersen A2 or A3, you can unlock unlimited colour options with the Custom Palette service.

The A3 and A2 feature our signature hidden cable system for convenient and discreet storage, while the Andersen Quartz delivers high performance in a sleek, compact form - ideal for those seeking a minimalist solution, with the choice of socketed or tethered options.

Each unit is built with a modular fascia system, allowing for easy updates if your aesthetic evolves. Whether you're upgrading your home or taking it with you to the next, Andersen charge points are designed to move with you and are built to last.
